Information for Purchasers

PACKING CHARGES: We charge for same only to cover the cost of material used.

PRICES: All prices quoted in this list are for stock at Niles. Freight and express are to be paid by purchasers.

ERRORS: Errors or complaints must be reported within ten days of receipt of goods.

BASIS OF THE SIZES AND CALIPER MEASUREMENTS FOR TREES

On all deciduous fruit trees, except Almonds and Figs, the caliper and height combined determine the grade of the tree.

Not less than 1 inch represents 8 to 10 ft. trees.

Not less than $\frac{5}{8}$ inch represents 6 to 8 ft. trees.

Not less than $\frac{1}{2}$ inch represents 4 to 6 ft. trees.

Not less than $\frac{3}{8}$ inch represents 3 to 4 ft. trees.

Not less than $\frac{1}{4}$ inch represents 2 to 3 ft. trees.

Almonds and Figs are inclined to grow stocky, and the caliper measurements will govern the grade regardless of the height of the tree.

ALMONDS

Not less than $\frac{1}{2}$ inch represents 4 to 6 ft. trees.

Not less than $\frac{3}{8}$ inch represents 3 to 4 ft. trees.

Not less than $\frac{1}{4}$ inch represents 2 to 3 ft. trees.

FIGS

Not less than $\frac{5}{8}$ inch represents 4 to 6 ft. trees.

Not less than $\frac{1}{2}$ inch represents 3 to 4 ft. trees.

Not less than $\frac{3}{8}$ inch represents 2 to 3 ft. trees.

Stocks mentioned in this list will be furnished as follows: 5 of a variety at the 10 rate; 50 at the 100 rate; 300 at the 1000 rate.

TERMS AND REMITTANCES

These Prices Supersede All Others

All of our stock is sold for cash, unless other arrangements are made. Remittances can be made to us either by post office or express money order, registered letter, bank draft, or check. It often happens that our customers find it more convenient to send us a personal check on their local bank and such checks will be accepted for collection.

On all orders placed in advance we ask that a 20 per cent deposit be forwarded with the order and we will then reserve the stock for shipment at any time designated by the customer.

ZANTE CURRANT

The Zante Currant (sometimes known as the Greek Currant of Commerce) has not been planted in California on a large scale. It is now becoming popular and large acreages will be set out as fast as the vines can be procured.

The vine is a strong grower; bunches medium; berries small, seedless; skin thin, black. Ripens in August.

Protect Your Trees

Planters and Nurserymen are particularly anxious to secure a perfect stand of their trees and to avoid as far as possible any injury to them by sunburn, rabbits, squirrels, etc.

For such protection we advise the use of—

YUCCA TREE PROTECTORS

as we have found them to be very efficient and satisfactory to our many customers who are now using them.

The Yucca Protector is made from the Yucca Palm, being cut very thin (in the same manner as veneer wood) so as to admit plenty of ventilation and still afford the necessary protection for the young trees.

We are able to supply the Yucca Protectors, in the several sizes, at the following prices:

Length	Width	Wgt.	Per 25	Per 50	Per 100	Per 1000
		Per 100				
30 in.	7 in.	22 lbs.	\$1.00	\$1.50	\$2.50	\$22.00
24 in.	7 in.	22 lbs.	.90	1.25	2.00	19.00
18 in.	7 in.	13 lbs.	.80	1.10	1.75	16.00
16 in.	7 in.	12 lbs.	.70	1.00	1.50	14.50
14 in.	7 in.	10 lbs.	.60	.85	1.40	13.00
12 in.	7 in.	9 lbs.	.50	.75	1.30	12.00
